Mathy,

ATSDR appreciates the opportunity to continue to work closely with EPA on the private well evaluations in Dimock. To address EPA Region 3's December 2011 request to ATSDR, as well as individual requests ATSDR has received directly from residents since the fall of 2011, ATSDR will provide a focused public health review of EPA's 2012 private well sampling information from Dimock in a health consultation document. This document will primarily focus on EPA's comprehensive 2012 private well sampling information. ATSDR has already informally agreed with EPA's individual well by well toxicological screening evaluations of this 2012 private well sampling information. This proposed health consultation will formally document this agreement, as well as provide our public health evaluation of general potability water quality issues in these private wells (this is outside of EPA's CERCLA regulatory authorities).

C.
